

PRESIDENCY SCHOOL

wings of imagination

Presidency Kindergarten
SCHOOLS

The early years are very crucial to lifelong learning, well being and lays the foundation for upcoming years at school. Every child deserves the best possible start in life and support to reach their full potential. Kindergarten at Presidency strives to provide an ambience for learning that triggers wondrous experimentation, creativity and exploration. We nurture the natural curiosity and joy for learning that young children possess, by providing a well-structured Kindergarten program, high quality personal care and abundant learning experiences.

welcome to our world...

"Every day is beautiful, every moment a new discovery, we laugh, we learn, we have lots of fun in our exciting journey as we find new confidence every day!"

The key features of our curriculum are:

**Holistic
Development**

**Multi
Disciplinary
Approach**

**Unique
Child**

**our
curriculum**

**Activity
Based
Learning**

**STEAM
Approach**

**Thematic
Curriculum**

Knowing the Kindergarten way

Learning is all about caring, sharing and responding. The experiences of Early Years sets the tone for lifelong learning. The utmost care has gone into designing an experiential learning curriculum exclusively for the little ones at Presidency. Our curriculum framework is deeply grounded in theories of learning that encourage children to think creatively, develop problem solving abilities and promote social-emotional skills so that they will succeed in a complex and ever changing world. Ample opportunities are provided to lure the young absorbent minds as they discover the various domains of learning in early childhood.

the big bad wolf...

"Today we learnt about the big bad wolf and the brave little girl. It was fun, with the teacher narrating the story using different voices, I pretended to be the Grandma in the story!"

Language is pervasive in almost everything children do. At Presidency, we ensure that children are immersed in a broad palette of literacy experiences. Reading aloud is the foundation and one of the building blocks of literacy development. It teaches children to be good listeners, grow their imagination and expose them to new vocabulary. Storytelling opens a realm of life itself which children adore and cherish. Children enjoy and absorb the stories with enthusiasm, interest in the story animation, and the use of voices as tools in making the characters and action come alive. This is supported by a strong, scientific and a multi-sensory phonic programme that gives them adequate opportunities to practice and build independent reading eventually. Apart from stories, children are immersed in songs, chants, phonemic awareness, literacy centres and writing activities that build a strong foundation for early literacy

At our Kindergarten classrooms, free choice is an invaluable chunk of time. Every child is unique and so are their preferences. A child develops a more genuine interest and learns to follow the direction of his or her 'inner voice' when given the freedom to choose his or her work. The free will of every child is respected and nurtured. We create an environment for children where they can choose to work on, perhaps a puzzle, stringing beads, building blocks or simply looking at a book. This span of time is crucial in making a child independent, aids their decision making, puts to use their growing social skills and also serves as an opportunity to practice what they learn in class.

i love this room...

"Full of things to do, I play to learn and learn to play with my teacher and my friends."

Three, four and five-year-olds are natural, enthusiastic learners. Their impulse to ask questions, to investigate, to explore, examine, and experiment, comes from a burning curiosity about the world and a desire to understand things. They learn, grow and absorb through the plenty of opportunities provided to them to interact with the materials and the environment. Our thematic curriculum gives young learners exposure to various themes that blend to make sense of the world around them in the most thoughtful and engaging way.

Why is the sun yellow?

"Today we learnt that the sun is also a star and it looks yellow to us because of the air around the earth - something called atmosphere!"

STEAM is an educational approach to learning that uses Science, Technology, Engineering, the Arts and Mathematics as thresholds for guiding a child's inquiry, triggering dialogue and promoting critical thinking. Our Themes are woven around the STEAM approach to make learning more effective and the end results are astonishing. It enables a child to take thoughtful risks, engage in experiential learning, problem solving, embrace collaboration and work through the creative process. With a sound foundation of STEAM in their learning, they are equipped to grow into future innovators, educators, leaders and learners of the 21st century!

the little steam engine that could...

"Did you know that the steam that we see from a tea cup can move an engine, so light yet so powerful..."

**Faculty:**

The role of a teacher in early education is critical for the holistic development of a child. Our Kindergarten educators are competent, committed and energetic. Regular trainings and workshops on pedagogy and professional development enables them to enrich the learning experience of the child.

my teacher, my best friend...

"Always around, always with a smile, she is there to guide me as I discover more each day."

Transport

School buses are available from specific pickup points. Lady attendants will be there in all the buses.

Safety and Security

Safety and security of every child is of utmost importance to us at Presidency. In order to uphold this, various measures are adopted such as- Mandatory Visitor Registration at the entrance.

Complete surveillance of the schools through CCTV cameras.

Complete and constant vigilance of every child by Teachers/ Coordinators and all the staff members.

Parent teacher Connect

A parent is the foremost influential teacher in a child's life. We believe that learning goes beyond the classroom, thus, a close partnership between the school and parent is vital in the best interest of the child. Presidency encourages parent participation in their child's education to the fullest.

Handbooks, PTMs/ Open Houses and Newsletters help us communicate with our parents on a regular basis besides other planned parent engagement programmes.

The Best in Facilities

Walk by our Kindergarten section - it is vibrant with colour, music and the joy of an activity centered learning. The school facilities include an architecturally designed, carefully crafted school building with happy breathing space and well ventilated classrooms; ergonomically designed furniture; bright visuals, display boards, smart boards in classrooms and an array of Nursery equipment, in fact everything to beguile the little learners.
